

Accordion Systems

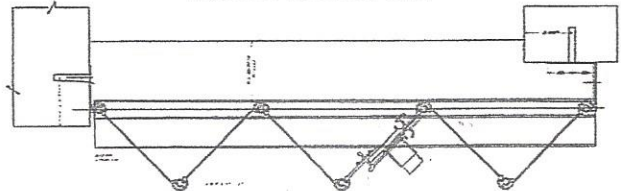

Accordion systems are the most economical type of security and storm shutters. When open, accordion shutters fold compactly to the sides, allowing full use of natural light and entrance areas. When locked they are a strong protection against theft, unwanted entry and the elements.

**Rollingshield™
Accordion Shutters**

Constructed to deliver safe and reliable weather control, storm protection and security. Many high-rise communities are installing Rollingshield Accordion Shutters, even in high risk areas such as coastal zones. Coastal communities in Florida and around the country have enforced new and more stringent building guidelines. Rollingshield has met and surpassed all newly imposed requirements for building and installation of shutters.

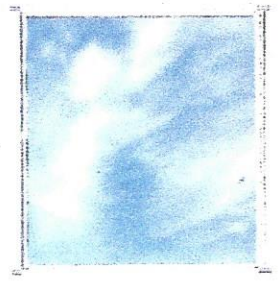

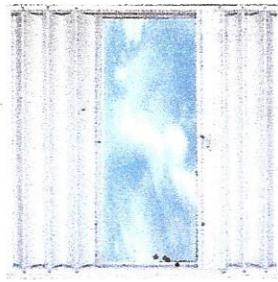

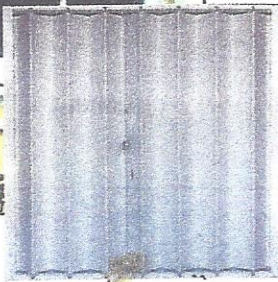

IMPACT RESISTANT.

**Rollingshield™
RS One Accordion System**

The Rollingshield™ RS One Accordion System is designed for single family residences, low-rise, mid-rise and hi-rise structures. Designed with a 5-inch blade, every system comes with standard support pins on both top and bottom. The Rollingshield™ RS One is extremely reliable and is equipped with standard locking rods and keyed push-lock mechanism.
